PROFESSIONAL SUMMARY

Highly skilled Full-Stack Engineer and Enterprise Architect with extensive experience in developing scalable web/mobile applications and robust ERP integrations. Proficient in the MERN stack, Frappe/ERPNext framework, and advanced 3D interactive graphics. Strong background in telecommunications engineering concepts, digital signal processing, and low-level Linux environments.

TECHNICAL SKILLS

Web & Mobile:	MongoDB, Express.js, React, Node.js (MERN), React Native, Tailwind CSS
Enterprise Solutions:	Frappe Framework, ERPNext customization, Inventory Management, REST APIs
3D Graphics & Scripting:	Blender (Python Scripting), Three.js, React Three Fiber, Procedural Modeling
Systems & Networks:	Linux Administration (Parrot OS, Kali), Telecom Signal Processing (CSI Tools, Digital Filters)

KEY PROJECTS & EXPERIENCE

Enterprise ERP & Inventory Customization

Designed and deployed custom ERPNext controllers and automated workflows using the Frappe framework. Integrated external React dashboards with ERPNext backends via secure REST APIs, optimizing consignment stock management and tracking.

Interactive 3D E-Commerce Platform & Applications

Developed a full-stack e-commerce solution deploying interactive 3D storefronts using React Three Fiber and Three.js. Automated procedural assets generation in Blender via custom Python scripting.

EDUCATION

Bachelor of Information Systems
Future Academy

Graduated: 2021
Born: 1998
